RESEARCH PROJECTS

5. **Tutorial: Reinforcement Learning for Character Animation**
Akihisa Watanabe, 2023. [paper]
 - Reviewed the mathematical fundamentals of reinforcement learning applied to character animation.
 - Provided a practical guide with examples drawn from UC Berkeley's CS285 course to illustrate the application of these concepts in character animation.
6. **Reinterpretation of 'Eternal Sunshine of the Spotless Net: Selective Forgetting in Deep Networks'**
Akihisa Watanabe, 2023. [paper]
 - Provided an alternative interpretation of the selective forgetting process as shifting the optimal weights, rather than minimizing the KL divergence between distributions.
 - Identified and corrected an error in the original paper's proof of Proposition 4.
